

## LM180-RP

LM180-RP is a premium quality grade of cork underlayment material that LEECORK offers as a versatile cork underlayment material for commercial and residential applications. It is in roll form with medium granule size and low density. It is the high quality option of cork underlayment product of LEECORK. Thickness variety is 2.0mm-6.0mm.

### Technical Specifications

<b>Description</b>	Cork roll for underlayment
<b>Grade</b>	LM180-RP
<b>Standard dimensions</b>	1220mm Width x 15.25meter Length x 6.0mm Thickness (48 " x 50' x Approx. 1/4 " ) *Various sizes & thicknesses are also available.
<b>Dimension tolerance</b>	Width: +/-5mm, Length: +/-25mm, Thickness: +/-0.2mm
<b>Binder</b>	Resin of polyurethane
<b>Raw material</b>	Cork granules sized 2-4mm mainly *Customers' cork granules sizes are also available.
<b>Density</b>	180-210kgs/cbm *Customers' density requests are also available.
<b>Tensile strength</b>	≥0.40 MPa
<b>Compressibility</b>	20-50 (100psi load)%
<b>Recovery</b>	≥75%
<b>Flexibility</b>	≤5 (multiple)
<b>Disintegration</b>	None after 3 hours immersion in boiling water.
<b>Thermal insulation</b>	*The thicker the cork roll is, the better the thermal insulation is.
<b>Acoustical ratings</b>	The thicker the cork roll is, the better the acoustical benefits are. *Acoustical ratings for 6mm cork are available.
<b>Fire behavior</b>	Fire inhibitor - Neither spreads flame nor releases toxic gases on combustion
<b>Additional tech info</b>	For further information of the above " * " & additional technical information, please contact LeeCork® freely.

### Advantages

- \* Top performance of reducing impact noise
- \* Good performance of thermal resistance
- \* Light weight - Easy to handle & transport
- \* Roll in shape - Easy to install
- \* Environmental friendly

### Pricing, Packing & Loading quantity information

<b>Pricing</b>	LeeCork® can offer QUICK quotation within ONE working day based on customer's basic information of order quantity, shipment destination, packing instructions, price term & etc.
<b>Standard packing</b>	Each cork roll #LM180-RP is wrapped with cardboard & two cardboard covers at both ends. There is a paper column tube in the middle of cork roll in order to prevent it from pressing damage.
<b>Additional packing</b>	LeeCork® provides pallets packing besides the above standard packing for easy handling, loading & unloading during transport if customer requests.
<b>Loading quantity</b>	LeeCork® provides customer with the accurate loading quantities of cork roll #LM180-RP for 20'ST, 40'GP & 40'HC no matter standard packing or additional packing condition.
